

The HPULB4S1 Ultra-Low-Background Lead Shield is a 10 cm (4 in) high performance copper/tin lined lead shield for germanium detectors (HPGe). The graded liner is designed for the suppression lead x-rays and consists of a tin layer of 1 mm (0.040 in.) covered by a oxygen free copper layer of 1.6 mm (0.062 in.). The top opening components are stepped in a way to provide the best possible shielding. The top has a built in sliding lock to help facilitate safe operation. The shield includes a rigid stand with adjustable feet to maintain the unit level while allowing easy access to install or remove the detector. The HPULB4S1 exterior and stand is coated with durable epoxy paint while all copper components are coated with a clear polyurethane sealer to prevent corrosion.

All shields are adjusted at the factory and movable doors and lids are positioned with packing material to prevent opening during shipment. All shields require professional installation by qualified riggers that are competent with heavy weight installations. Once installed, the lids should require only minimal adjustment to remove any packing material and assure proper operation.

Each shield is supplied with a rigid support stand and bottom plug.

The HPULB4S1 shield is designed to accommodate ORTEC vertical dipstick cryostat models CFG-PV4, CFG-SV, CFG-LP-SV, and CFG-ICS-x.

The cutaway sketch shows the shield with the supplied bottom plug.

HPULB4S1 Specifications

Overall	Height: 635 mm (25 in) Width: 508 mm (20 in)
Cavity	Diameter: 279 mm (11 in) Depth: 406 mm (16 in)
Outer Jacket	9.5 mm (3/8 in) thick low-carbon steel
Shield	Total: 100 mm (4 in) thick lead shielding Inner: 25 mm (1 in) thick ultra-low-background lead, Pb-210 content 25 ± 4 Bq/kg
Graded Lining	1 mm (0.04 in) tin and 1.6 mm (0.062 in) oxygen free copper
Weight	1090 kg (2400 lbs)

*All Lead is fully encased in metal.

HPULBS

High-Performance, Ultra-Low-Background Shields and Accessories for HPGe Detectors

Accessories

DS30 Dewar Leveling Stand

Provides up to 15 cm (6 in.) of vertical height adjustment and features vibration isolation pads to minimize detector microphonics.

Ordering Information

Model	Description
HPULB4S1	Top Loading Lead Shield for CFG-PV4, CFG-SV, CFG-LP-SV, and CFG-ICS-x cryostats.
DS30	Dewar Leveling Stand

Other styles of Ultra-Low-Background Shields for HPGe detectors are available. Examples are front-loading shields, shields for detectors with J-style cryostats, and six-inch shields. Contact your ORTEC Sales Representative for a solution to your particular shielding need.
